- Informal atmosphere and a friendly team that is geared towards results
- Good work-life balance

About Drone Harmony

Drone Harmony is a young company developing cutting edge mission planning technology for gathering data using drones in industrial applications, such as inspection and mapping. Drone Harmony's technology is unique in the drone space due to its' high level of sophistication, 3D working environment and advanced algorithmics.

Drone Harmony's product is a multi-platform (web, mobile) software solution that automates and streamlines the drone data acquisition process. It is the drone smart navigator, autopilot and organizational tool necessary to scale the digitalization process of commercial assets.
