Custom camera ****	×	×	×	×	×	I	?

* For X7S the following lenses are supported: 16mm, 24mm, 35mm, 50mm

** For Inspire 2 and M200 when using the X7 camera choose the M210 drone for planning missions.

*** For XT2 we assume the 640x512 sensor with 25 mm lens. This gives horizontal angle of 25 degrees and 20 vertical angle. Until we have support of changeable lenses input, we assume the narrowest possible lens (this gives in worst case more overlap than needed). There is a way to plan for a specific angles, if you select the m600 drone profile, then you can plan for custom camera angles. Other DJI lens angles can be found here: www.dji.com/zenmuse-xt2/specs

**** To configure custom camera angles go to menu / general / settings / Custom camera section.
