## Mobile Devices (also built into remote controllers)

Devices with Android 5 to 10	✓	
Devices with iOS		
DJI CrystalSky	✓	Follow crystal sky installation instructions: <a href="https://cs.droneharmony.com">cs.droneharmony.com</a>
DJI Smart Controller (Mavic 2, Matrice 300)		
DJI Phantom 4 Professional Plus (P4P+) Remote controller	?	Follow crystal sky installation instructions: <a href="https://cs.droneharmony.com">cs.droneharmony.com</a>

### Our Device Recommendations

SM-T395 Samsung Galaxy Tab Active 2	✓	a bit bulky
SM-T835 Samsung Galaxy Tab S4	✓	a bit expensive
Samsung Tab A	✓	a cheaper option

### Hardware conflicts (with DJI libraries)

Intel chipset devices	✗	
Asus	?	Supported only with ARM chipsets

\* For X7S the following lenses are supported: 16mm, 24mm, 35mm, 50mm

\*\* For Inspire 2 and M200 when using the X7 camera choose the M210 drone for planning missions.

\*\*\* For XT2 we assume the 640x512 sensor with 25 mm lens. This gives horizontal angle of 25 degrees and 20 vertical angle. Until we have support of changeable lenses input, we assume the narrowest possible lens (this gives in worst case more overlap than needed). There is a way to plan for a specific angles, if you select the m600 drone profile, then you can plan for custom camera angles. Other DJI lens angles can be found here: [www.dji.com/zenmuse-xt2/specs](http://www.dji.com/zenmuse-xt2/specs)

\*\*\*\* To configure custom camera angles go to menu / general / settings / Custom camera section.

## Legend

- ✔ Supported by this DH license
- ✗ DJI does not offer 3rd party software support
- 🔍 Awaiting Release / Checking compatibility
- Not supported under this DH license
-  Support in development
- ❓ Not tested, might work
